

## Table of Contents

1.0	Introduction .....	1
1.1.	Developing the Stormwater Green Incentive Document (Credibility) .....	1
1.2.	Change in Stormwater Design Paradigm.....	1
1.3.	Why a Change in Design Paradigm .....	2
2.0	Low Impact Development.....	3
2.1.	What is Low Impact Development (LID)? .....	3
2.2.	Why use LID (Incentives)? .....	5
2.2.1.	Ancillary Benefits from LID Stormwater Management Techniques .....	5
2.2.2.	Reduction in Stormwater Infrastructure Sizing .....	10
2.2.3.	Water Quality Volume Reduction .....	10
2.2.4.	Water Quantity Reduction .....	12
2.2.5.	Reduction in Stormwater Utility Fee .....	21
2.2.6.	Analysis of Stormwater Fee Incentive .....	21
2.2.7.	Options for Small Spaces/Redevelopment Areas .....	23
3.0	Techniques to Reduce Impervious Cover:.....	25
3.1.	Rooftop Disconnection( <b>Under Review</b> ) .....	25
3.2.	Pavement Disconnection( <b>Under Review</b> ) .....	26
3.3.	Maximize Tree Canopy Over Impervious Cover. ( <b>Under Review</b> ) .....	27
3.4.	Install Green Roofs to Reduce Impervious Area .....	28
3.5.	Install Permeable Pavement Systems to Reduce Impervious Area .....	28
4.0	Green Design Fact Sheets/ Design Techniques .....	30
4.1.	Green Roofs .....	32
4.2.	Permeable Pavement Systems.....	47
4.3.	Cisterns and Rain Barrels .....	65
4.4.	Filter Strips.....	74
4.5.	Bioretention (rain gardens) .....	82
4.6.	Low Impact and Retentive Grading .....	96
4.7.	Swales .....	104
4.8.	Subsurface Infiltration .....	113
4.9.	Inlet &Outlet Controls .....	121
4.10.	Filters .....	130
4.11.	Subsurface Vaults .....	140
4.12.	Detention Basins .....	145
5.0	Stormwater Landscape Guidance Introduction.....	154
5.1.	Planting Recommendations / Guidelines .....	154
5.2.	Facility Specific Landscaping Guidance .....	159
5.3.	Native and Recommended Non-invasive Plants .....	165
6.0	Comparison and Applicability .....	173
6.1.	Evaluation of Green Design Techniques .....	174

## List of Figures

Figure 2.1.1: Impacts of Typical Development to the Natural Water Balance.....	3
Figure 2.1.2: Green Roof Technology Chain of Benefits .....	7
Figure 2.1.3: Relationship Between Required Water Quality Volume Storage and Site Imperviousness (%) .....	11
Figure 2.1.4: SCS Solution of the Runoff Equation .....	13
Figure 2.1.5: Conventional Site Example .....	15
Figure 2.1.6: LID Site Example .....	16
Figure 2.1.7: Indianapolis Redevelopment Site Design Example Conventional vs. LID.....	18
Figure 2.1.7: Indianapolis Redevelopment Site Design Example Conventional vs. LID, cont....	19
Figure 2.1.8: Indianapolis New Development Site Design Example Conventional vs. LID.....	20
Figure 2.1.9: Redevelopment LID Water Quality Design Example .....	24
Figure 3.1.1: Gravel Level Spreader Connected to Filter Strip .....	27
Figure 3.1.2: Example Permeable Pavement System Impervious Area Reduction Technique ....	29
Figure 5.2.1: Zone of a Bioretention System.....	162

DRAFT

## List of Tables

Table 2.1.1: Green Roof Cost Comparison to Conventional Roofing System and Cool Roofing System ( <a href="http://www.greenroofs.net">www.greenroofs.net</a> ) .....	8
Table 2.1.2: Area-Weighted CN Calculation for Conventional Design .....	15
Table 2.1.3: Area Weighted CN Calculation for LID Design .....	16
Table 2.1.4: Example Stormwater Utility Fee Calculation .....	22
Table 3.1.1: Partial Rooftop Disconnection.....	26
Table 4.1.1: Green Roof Potential Application and Stormwater Regulation .....	33
Table 4.1.2: Green Roof Maintenance Guidelines.....	42
Table 4.2.1: Permeable Pavement Potential Application and Stormwater Regulation.....	48
Table 4.2.2: Suggested Starting Porous Pavement Design Values .....	54
Table 4.2.3: Required Choker Course Gradation.....	55
Table 4.2.4: Required Stone Storage Gradation .....	55
Table 4.2.5: Porous Bituminous Aggregate Gradation.....	56
Table 4.2.6 : Porous Pavement Maintenance.....	60
Table 4.3.1: Rain Barrel Potential Application and Stormwater Regulation.....	65
Table 4.3.2: Suggested Storage Design Values for Rain Barrels .....	68
Table 4.3.3: Rain Barrels & Cisterns Typical Maintenance Guidelines (*) .....	70
Table 4.4.1: Filter Strips Potential Application and Stormwater Regulation.....	75
Table 4.4.2: Suggested Starting Design Values for Filter Strip Length .....	77
Table 4.4.3: Suggested Maximum Velocities and Water Depths for Filter Strip Area .....	78
Table 4.4.4: Filter Strips Maintenance Guidelines .....	80
Table 4.5.1: Bioretention Potential Application and Stormwater Regulation .....	83
Table 4.5.2: Suggested Starting Design Values for Areas and Depths.....	89
Table 4.5.3: Bioinfiltration/Bioretention Maintenance Guidelines .....	91
Table 4.6.1: Low Impact and Retentive Grading Potential Application and Stormwater Regulation .....	97
Table 4.6.2: Starting Design Values for Berm Areas and Depths .....	99
Table 4.6.3: Berm & Grading Maintenance Guidelines .....	102
Table 4.7.1: Swales Potential Application and Stormwater Regulation.....	104
Table 4.7.2: Suggested Swale Starting Design Values .....	107
Table 4.7.3: Swale Maintenance Guidelines.....	111
Table 4.8.1: Subsurface Infiltration Potential Application and Stormwater Regulation .....	113
Table 4.8.2: Starting Design Values for Subsurface Infiltration Areas and Depths .....	116
Table 4.8.3: Subsurface Infiltration Maintenance Guidelines .....	119
Table 4.9.1: Inlet Maintenance Guidelines .....	126
Table 4.9.2: Outlet Maintenance Guidelines .....	129
Table 4.10.1: Filters Potential Application and Stormwater Regulation .....	131
Table 4.10.2: Suggested Starting Design Values for Ponding and Media Depths .....	136
Table 4.10.3: Filter Maintenance Guidelines.....	137
Table 4.11.1: Subsurface Vaults Potential Application and Stormwater Regulation .....	140
Table 4.11.2: Subsurface Vaults Maintenance Guidelines .....	143
Table 4.12.1: Detention Basins Potential Application and Stormwater Regulation.....	145
Table 4.12.2: Starting Design Parameters for Detention Basins .....	150
Table 4.12.3: Contour Design Parameters for Detention Basins .....	151
Table 4.12.4: Inlet Control and Sediment Forebay .....	151

Table 4.12.5: Detention Basin Maintenance Guidelines .....	153
Table 5.1.1: Planting Specifications .....	159
Table 5.2.1: Lowest Zone (Hydrologic zones 2-4) Suggested Plants.....	163
Table 5.2.2: Middle Zone (Hydrologic zones 4-5) .....	163
Table 5.2.3: Outer Zone (Hydrologic zones 5-6).....	163
Table 5.3.1: DMD Landscaping Guidance .....	167
Table 5.3.2: Recommended Plant Lis .....	168
Table 6.1.1: Evaluation of Stormwater Reduction BMPs.....	175
Table 6.1.2: Cost Effectiveness of Stormwater Reduction BMPs .....	177

## Appendices

- Appendix 1: Low Impact Development for Big Box Retailers
- Appendix 2: New Life Cycle Calculator Compares the Cost of Green Vegetative Roofs with Conventional Roof Systems and Life Cycle Cost Calculator-Phase 1
- Appendix 3: Milwaukee Metropolitan Sewerage District (MMSD) Quicksheet 1.2
- Appendix 4: Urban Watershed Forestry Manual; Part 2: Conserving and Planting Trees at Development Sites
- Appendix 5: City of Indianapolis Redevelopment Site Design Example
- Appendix 6: City of Indianapolis New Development Site Design Example
